SUMMARY

Product Designer with 3+ years designing mobile and web products end-to-end — research, user flows, prototyping, design systems and developer handoff — built on 8+ years of graphic design. I lead the digital transformation of loan operations at a microfinance institution and have shipped products for the Saudi market. An accounting background helps me turn complex financial workflows into simple interfaces.

EXPERIENCE

Product Designer (UI/UX) — Al Tadamun Microfinance Foundation

2023 – Present

Cairo, Egypt · Microfinance / Fintech

- Led the digital transformation of the Operations Department: mapped existing manual loan workflows and redesigned them as digital flows, improving speed, data accuracy and management decision-making.
- Designed three connected mobile products end-to-end: the client-facing **loan application app**, a **loan officer app** for targets, incentives and repayment follow-ups, and a **monitoring & reporting app** giving supervisors real-time visibility into field operations.
- Ran usability tests with staff and clients, iterated on the findings, and maintained a shared design system that keeps the apps consistent and speeds up developer handoff.

Freelance Product Designer — Self-employed

2023 – Present

Remote · Clients in Saudi Arabia, the UK and Egypt

- **Bubblz (Saudi Arabia) – laundry delivery app:** designed the full customer and service-provider experience — research, brand identity, journeys, ordering, payments, urgent service and provider dashboards; **60+ screens in 7 weeks**. Case study ↗
- **Trendora – social media marketplace app:** designed a marketplace with a bidding system for account and growth services, with intuitive flows and a clean component library.
- **Learnnova – e-learning platform:** responsive web platform for students and mentors — course discovery, course pages and mentorship flows — backed by a scalable design system. Case study ↗
- **Premium Real Estate & LCIS (London):** designed and built a responsive corporate site for property listings and investment; created the visual identity, website UI/UX and social media system for a study-abroad consultancy.

Selected Case Studies

- **Kalo – healthy-meal subscription (Saudi Arabia):** naming, identity, packaging, social, UX and an animated website.
- **King Go – local super app (Alexandria):** delivery, ads marketplace, clinics and a shared wallet — **88 hi-fi screens**.
- **Rafiky – AI travel companion (Egypt):** trip planning, offer bidding, an AR explorer and payments — **80+ screens**.
- **Dream Home – real-estate website redesign (Egypt):** decision data on every card, map search, payment plans.
- **Premium Aqar – real-estate platform (Egypt):** city-by-city browsing, one-tap advisor contact, luxury redesign.
- **Easy Car – car-finance app (team UX case study):** interviews, competitor analysis and Maze usability tests.

Graphic Designer & Photographer — EX Egypt

2019 – Present

Remote · International health & student-exchange organization

- Designed campaign visuals and documented international programs (Winter & Summer Schools, EBSC) hosting 500+ students from around the world, collaborating with multicultural teams across countries.

Graphic Designer & Accountant — Dar Al-Emara

2017 – 2021

Cairo, Egypt · Finishing & engineering design company

- Produced marketing and presentation visuals for finishing and engineering projects alongside accounting duties.
