SUMMARY

UI/UX Designer with 3+ years of end-to-end product design for mobile and web — from user research, user flows and wireframes to high-fidelity prototypes, design systems and developer handoff — built on 8+ years of graphic design. Currently leading the digital transformation of loan operations at a microfinance institution, turning manual field and back-office processes into mobile apps for clients, loan officers and monitoring teams. Shipped work across fintech, on-demand services, marketplaces, e-learning and real estate, including fully bilingual Arabic/English (RTL) products for the Saudi market. An accounting background helps me turn complex financial workflows into simple interfaces.

EXPERIENCE

UI/UX Designer — Al Tadamun Microfinance Foundation
2023 – Present

Cairo, Egypt · Microfinance / Fintech

- Led the digital transformation of the Operations Department: mapped existing manual loan workflows and redesigned them as digital flows, improving speed, data accuracy and management decision-making.
- Designed the client-facing **loan application mobile app** end-to-end, simplifying the application journey and making microfinance services easier to access.
- Designed a **loan officer app** that brings targets, incentive tracking and repayment follow-ups into one mobile experience for field teams.
- Designed a **monitoring & reporting app** for the Monitoring and Control Unit, giving supervisors real-time visibility into field operations.
- Ran usability tests with staff and clients, iterated on findings, and maintained a shared design system for consistency and faster developer handoff.

Freelance UI/UX Designer — Self-employed
2023 – Present

Remote · Clients in Saudi Arabia, the UK and Egypt

- **Bubblz (Saudi Arabia) – laundry delivery app:** designed the full customer and service-provider experience — ordering, payments, urgent service and provider dashboards — with complete Arabic/English (RTL/LTR) support localized for the Saudi market.
- **Trendora – social media marketplace app:** designed a marketplace with a bidding system for account and growth services; built intuitive flows and a clean component library for a young, digital-native audience.
- **Learnnova – e-learning platform:** designed a responsive web platform for students and mentors, covering course discovery, course detail pages and mentorship flows, backed by a scalable design system.
- **Premium Real Estate – corporate website:** designed and built a responsive site for property listings, investment opportunities and services.
- **LCIS (London) – study-abroad consultancy:** created the visual identity, website UI/UX and social media design system.

Graphic Designer & Photographer — EX Egypt
2019 – Present

Remote · International health & student-exchange organization

- Designed campaign visuals and documented international programs (Winter & Summer Schools, EBSC) hosting 500+ students from around the world, collaborating with multicultural teams across countries.

Graphic Designer & Accountant — Dar Al-Emara
2017 – 2021

Cairo, Egypt · Finishing & engineering design company

- Produced marketing and presentation visuals for finishing and engineering projects alongside accounting duties.
